Profile Summary

UI Developer   Sep 2022 – Present

 Coanetwork private limited | Somajiguda, Hyderabad

As a UI Developer, I am responsible for creating and maintaining visually appealing and highly functional user interfaces for web and mobile applications. I work closely with UX/UI designers to transform their designs into interactive and responsive elements using technologies like HTML, CSS, JavaScript

- **Enhanced User Interfaces**: Optimized and modernized UI components across multiple projects, resulting in a 30% faster load time and improved responsiveness, elevating the overall user experience.
- **Collaborative Front-End Development**: Worked closely with UX designers and back-end developers to create seamless, interactive user interfaces, ensuring consistent design standards and efficient integration across the team.
- **Implemented Responsive Design**: Developed adaptive layouts using HTML5, CSS3, and JavaScript frameworks to ensure compatibility across devices and screen sizes, achieving a mobile-friendly user experience that increased engagement by over 15%.
- **Version Control & Collaboration**: Leveraged Git for version control and participated in code reviews and pull requests, ensuring code consistency, best practices, and knowledge sharing across the team.
- **Performance Optimization**: Analyzed and optimized UI performance through lazy loading, code splitting, and minimizing DOM manipulations, reducing render times and enhancing user interactions.
- **Responsive, Interactive Animations**: Developed engaging animations and micro-interactions using CSS and JavaScript, making the user experience smoother and more intuitive across various sections of the product.

WORK EXPERIENCE

With over 2 years of experience at **COA Network**, I have had the opportunity to contribute to various company projects, particularly in my role as a UI Developer. During this time, I worked on developing user interfaces, collaborating closely with both designers and back-end developers to ensure seamless integration and a smooth user experience. My contributions have helped enhance the functionality and design of key projects, improving the overall product quality and user satisfaction.

PROJECTS

Hireguard   [Click to view website](#)

- Hireguard is a platform designed to help businesses identify and prevent backdoor hires—an illegal practice where individuals are hired in a way that circumvents official hiring processes or regulations. The tool is particularly valuable in maintaining transparency, ensuring compliance, and safeguarding against fraud in recruitment processes.
- Developed responsive and user-friendly UI components for the HireGuard platform, translating design specifications into functional code.
- **Used Technologies:** Angular and bootstrap 5 for front end, .net for backend.

ITeleCenter Backoffice   [Click to view promosite for backoffice](#)

- Contributed to the redesign and modification of the UI for iTeleCenter's backoffice platform, improving functionality and user experience.
- Worked on enhancing the ease of use by streamlining workflows and refining interactive elements, ensuring a smooth and intuitive user interface for the admin panel.
- **Used Technologies:** Bootstrap and js for front end, .net for backend.

Expertmarketing

- ExpertMarketing is a tool or platform primarily designed to help sales managers bring in clients for products. It is typically used in sales and marketing teams to streamline client acquisition processes, manage leads, and optimize product outreach. Sales managers use ExpertMarketing to identify potential customers, track leads, and execute marketing strategies that drive business
- It is built using **Kendo UI** for the front-end and **.NET** for the back-end.

EDUCATION
